December 6, 2004
Marine Fisheries Advisory

2,000 LB. LANDING/POSSESSION LIMIT EFFECTIVE FOR ATLANTIC HERRING 1B FISHERY.

On December 3, 2004, NOAA Fisheries projected that 95% of the Atlantic herring Total Allowable Catch (TAC) allocated to Management Area 1B (see map below) for the 2004 fishing year would be harvested by December 8, 2004. The Division of Marine Fisheries is providing this reminder that effective 0001 hours on December 8th vessels issued federal permits for Atlantic herring may not retain or land more than 2,000 pounds of Atlantic herring from Area 1B per trip or calendar day for the remainder of the 2004 fishery. The federal catch limit restriction will cease at 0001 hours, January 1, 2005.
